# TRAFFICPRINTER®

## Innovative Technology

Trafficprinter® is a one-of-a-kind machine that is designed to save lives and revolutionize road marking.

## Substitute Hand Application

Trafficprinter works with a single operator, replacing the entire team of workers needed for hand application methods.

## Cost Efficient

Reduce staff, improve efficiency, and increase profit. Trafficprinter offers ROI in less than 3 years.

## Automated Application

The Trafficprinter® is capable of printing or repairing thermoplastic road symbols with geometric precision, adhering to global regulations.

## Environmentally Sound

Reduces the need for traffic management, helping minimize vehicle congestion and traffic-related pollution.

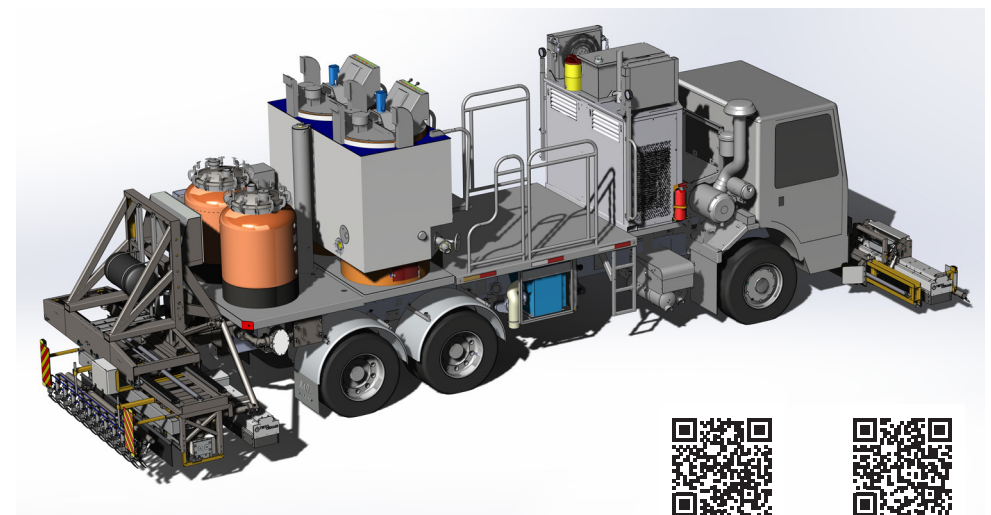

## Reduces Work Accidents

The single-operator Trafficprinter eliminates the need for boots-on-the-ground workers, reducing worksite accidents.

Advanced operating system.
